SUMMARY

Full-Stack Engineer with 9+ years of end-to-end ownership shipping production systems across React, TypeScript, PHP, and AWS. Specialized in Web3 and dApps: owned Polkadot/Substrate and EVM products and cross-chain bridging SDKs end to end, working across frontend, on-chain integrations, CI/CD, and cloud infrastructure in fast-paced environments. Also experienced leading a cross-functional team of 6 (developers and QA) through delivery.

EXPERIENCE

Available to start immediately · career break for childcare since June 2026

Full-Stack Software Engineer — Purestake / Opslayer — Oct 2021 – Jun 2026
Madrid · Remote

- Early-stage, fast-paced Web3 startup; continued on the same team after Purestake spun out Opslayer (ops and web apps).
- Owned end-to-end development of production React/TypeScript apps for Web3 products, including product and UX decisions for wallet connectivity, cross-chain bridging, and on-chain analytics, so users got coherent flows instead of chain-by-chain one-offs.
- Designed and built bridging SDKs that abstracted multi-system integrations for consuming teams, with docs, examples, and starter guides to speed adoption.
- Implemented CI/CD with GitHub Actions and automated testing with Playwright and Vitest, improving deployment reliability and reducing downtime.
- Shipped wallet-connected product features and on-chain data querying across Polkadot/Substrate and EVM ecosystems.
- Migrated web app infrastructure to AWS serverless to cut deploy complexity and ops load; operated production services with 99.9% uptime.

Full Stack Developer — Digimobil — Apr 2021 – Oct 2021
Madrid

- Developed internal logistics management web application to track and optimize inventory movement, reducing manual workload by 50%.
- Built RESTful APIs in PHP (Symfony), interfacing with SQL Server for real-time data tracking.
- Improved application security by implementing user authentication and role-based access control.

Project Manager / Full Stack Developer — Imaweb — Feb 2017 – Mar 2021
Madrid

Project Manager (Dec 2019 – Mar 2021)
Project Leader (Jul 2019 – Dec 2019)
Full Stack Developer (Aug 2017 – Jul 2019)
SQA Developer (Feb 2017 – Aug 2017)

- Progressed from SQA Developer to Full Stack Developer, Project Leader, and Project Manager on automotive CRM products.
- Managed a cross-functional team of 4 developers and 2 QA testers; delivered 20+ releases on time and improved customer satisfaction by 25%.
- Built core CRM modules used by 500+ European car dealerships; integrated REST/SOAP APIs and tuned MySQL performance.
- Refactored legacy PHP and optimized queries, reducing page load times by up to 60%.

EARLIER ROLES

- Natural ADABAS Junior Programmer — Software AG · Madrid · Jun 2016 – Feb 2017
- Maintenance Engineer — Empresas Polar · Caracas · May 2014 – Feb 2015

SKILLS

Core Skills

- Full-stack web application development and hosting
- Service integrations (REST APIs, WebSockets, SDKs)
- CI/CD pipelines, automated testing, and QA
- Cloud infrastructure and deployment automation (AWS)
- AI-native development with coding agents, including multi-agent orchestration across design, implementation, testing, and shipping
- Agile delivery and cross-functional collaboration
- Domain experience in Web3 / dApps (Polkadot and EVM)

Frontend: TypeScript, React, Next.js, Astro

Backend: Node.js, PHP, Symfony, Laravel, GraphQL

Cloud & Tooling: AWS, GH Actions, Docker, Playwright, Vitest, Jest, Postman

Data: MySQL, SQL Server, PostgreSQL, DynamoDB, Drizzle, Supabase

Web3: Polkadot.js, Wagmi, Ethers.js, Viem, Solidity

Collaboration: GitHub, GitLab, Jira, Confluence, Notion, Figma

EDUCATION

Diploma, Maintenance Planning Applied to Industrial Processes — Universidad Simón Bolívar · Caracas, Venezuela

Bachelor's Degree, Mechanical Engineering — Universidad Simón Bolívar · Caracas, Venezuela

CERTIFICATIONS & LANGUAGES

Certifications: Ethereum and Solidity (Udemy, 2021)

Languages: Spanish (Native) · English (Advanced)
