SUMMARY

Full-Stack Engineer with 8+ years building and shipping production web applications across React, TypeScript, PHP, and AWS. Strong end-to-end ownership across frontend, APIs, CI/CD, and cloud infrastructure, and experience leading a cross-functional team of 6 (developers and QA) through agile delivery. Recent work includes production client apps and developer SDKs with high reliability requirements, which is experience that transfers well to any product-focused engineering team.

EXPERIENCE

Software Engineer

June 2023 – Present

Opslayer · Madrid · Remote

- Owned end-to-end development of production React/TypeScript apps for Web3 products (Moonbeam and Tanssi dApps)—wallet connectivity, cross-chain bridging, and on-chain analytics.
- Built bridging SDKs that abstracted multi-system integrations for consuming teams, reducing integration complexity and improving developer experience.
- Shipped wallet-connected product features and on-chain data querying across Polkadot/Substrate and EVM ecosystems.
- Implemented CI/CD pipelines with GitHub Actions, improving deployment reliability and reducing downtime.
- Operated and supported AWS infrastructure, maintaining 99.9% service uptime.

Software Engineer

October 2021 – June 2023

Purestake · Madrid · Remote

- Built and maintained production React applications with complex third-party and contract integrations.
- Designed and maintained blockchain bridging SDKs that improved developer adoption and integration speed for partner teams.
- Migrated web app infrastructure to AWS serverless services, reducing deployment times and operational complexity.

Full Stack Developer

April 2021 – October 2021

Digimobil · Madrid

- Developed internal logistics management web application to track and optimize inventory movement, reducing manual workload by 50%.
 - Built RESTful APIs in PHP (Symfony), interfacing with SQL Server for real-time data tracking.
 - Improved application security by implementing user authentication and role-based access control.
-

Project Manager

December 2019 – March 2021

Imaweb · Madrid

- Managed a cross-functional team of 4 developers and 2 QA testers in the agile development of CRM solutions for automotive clients.
- Delivered 20+ project releases on time and within budget, improving customer satisfaction scores by 25%.
- Acted as primary liaison between clients and technical teams, translating business needs into functional requirements.
- Introduced sprint retrospectives and kanban boards, leading to a 15% productivity increase.

Project Leader

July 2019 – December 2019

Imaweb · Madrid

- Supervised development of custom modules for automotive CRMs, reducing feature request backlog.
- Mentored junior developer and QA tester, resulting in quicker onboarding and quality improvements.
- Ensured adherence to deadlines and code quality standards during high-priority client rollouts.

Full Stack Developer

August 2018 – July 2019

Imaweb · Madrid

- Built core modules for a CRM platform used by over 500 car dealerships across Europe.
- Integrated third-party systems using REST/SOAP APIs, enhancing data flow across platforms.
- Wrote backend services in PHP, managing relational data in MySQL and performance tuning SQL queries.

SQA Developer

August 2018 – July 2019

Imaweb · Madrid

- Refactored legacy PHP code and optimized MySQL queries, reducing page load times by up to 60%.
- Collaborated with development teams to triage and resolve bugs reported from production.

EARLIER ROLES

Natural ADABAS Junior Programmer

June 2016 – February 2017

Software AG · Madrid

Maintenance Engineer

May 2014 – February 2015

Empresas Polar · Caracas

EDUCATION

Diploma, Maintenance Planning Applied to Industrial Processes

Universidad Simón Bolívar · Caracas, Venezuela

Bachelor's Degree, Mechanical Engineering

Universidad Simón Bolívar · Caracas, Venezuela

SKILLS

CORE SKILLS

- Full-stack web application development and hosting
- Service integrations (REST APIs, WebSockets, SDKs)

- CI/CD pipelines, automated testing, and QA
- Cloud infrastructure and deployment automation (AWS)
- AI-assisted development (design, testing, and shipping)
- Agile delivery and cross-functional collaboration
- Domain experience in Web3 / dApps (Polkadot and EVM)
